

Most Outstanding Commercial Office Project Over \$10 Million

CHG Healthcare Services Headquarters

CHG’s culture and the importance of “Putting People First” drove every design-related discussion, and led to an incredibly diverse and welcoming atmosphere for the firm’s 1,200 employees. The \$54 million, 283,000 SF facility is part of the exciting View 72 development in Midvale, with expansive views of the Wasatch Mountains to the east and a plethora of top-shelf amenities for its occupants.

The ‘People Hub’ is a unique design element and serves as the center of

employee interaction, with a full-service cafeteria, coffee bar, and plenty of cool gathering spaces equipped with games and activities. The facility boasts approximately 250 workstations on each of its five floors, which tie in seamlessly with elevator lobbies, refresh areas, private offices, and conference rooms, each with a specific coloration that reflects a unique cultural core value.

Workstations are modern and functional, located on the perimeter of the floor plate to take advantage of natural

daylighting, while demountable wall-systems allow for seamless operational changes and future growth.

Owner: CHG Healthcare Services

Architect: MHTN Architects

(VCBO: Core & Shell)

General Contractor: Okland Construction

Electrical Engineer: Spectrum Engineers

Mechanical Engineer: PVE, Inc.

Structural Engineer: BHB Structural Engineers

Electrical Subcontractor: Rydalch Electric

Mechanical Subcontractor: CCI Mechanical
